DNP's Three Corporate Responsibilities

Value Creation

- Contributing to social development
- Research and development
- Creation of intellectual property, etc.

A company's first and most fundamental social responsibility is to provide value for society. We must realize the connection between offering products and services necessary to the sustainable development of society and

achieving growth for the company. By making our Business Vision a reality, DNP will continue to provide a high degree of value that helps resolve social problems.

2

DNP's Three Corporate Responsibilities

Integrity of Conduct

Respect for human dignity and diversity

Creating safe and vibrant workplaces

Ensuring the safety and quality of products and services

Information security

Promoting social responsibility throughout the supply chain

Environmental conservation and realizing a sustainable future

Contributing to society as a good corporate citizen

The second responsibility is practicing fairness and impartiality during the value creation process. Regardless of how superior or useful to society the value produced may be, that value will be compromised if, for example, the environment is damaged or laws are broken in the process of creating it. DNP seeks to fulfill its responsibilities by ensuring that all of its employees always act with integrity in accordance with the DNP Group Code of Conduct.

3

DNP's Three Corporate Responsibilities

Transparency (Accountability)

Proper disclosure of information

The third corporate responsibility is to achieve accountability and be a highly transparent company. DNP achieves accountability by having all employees, during the course of

their daily work, engage in dialogue with stakeholders; this entails both listening to stakeholders' opinions and providing correct information.

Prerequisites for fulfilling our three responsibilities

Compliance with laws and social ethics

Construction of systems that support business continuity

Prerequisites for fulfilling our three responsibilities

Compliance with Laws and Social Ethics

Rather than simply having each of our employees comply with laws and regulations in the execution of DNP's business activities, we believe that DNP can win society's trust by maintaining even higher ethical standards than society expects and by consistently remaining fair and equitable as

we help to maintain and develop orderly, free and competitive markets. In order to be able to act in ways that meet society's expectations, DNP works to imbue corporate ethics throughout the DNP Group.

Systems for Promoting Absolute Corporate Ethics

Prerequisites for fulfilling our three responsibilities

Construction of Systems that Support Business Continuity

In the event that an emergency situation should compromise the continuity of DNP's business operations, any interruption in our operations would affect not only DNP but our customers, suppliers, their employees and a variety of stakeholders. DNP has prepared a business continuity plan in order to build a strong corporate structure that can

continue operating under crisis conditions and quickly restore operations in the event of an interruption. We maintain a proper awareness of disaster risk in the course of our daily operations, and we implement employee training and other measures aimed at enabling us to cope appropriately in extreme situations.

Our 1st responsibility

Contributing to Social Development: Research and development

Given that DNP has expanded its fields of business by developing applications for printing and information technologies, research and development are extremely important to us. In today's rapidly changing world, we need to take consumers' point of view, look carefully at what is happening in society, and be quick to discern existing

problems and the technologies that are needed to solve them. Having done so, we then develop our own original technologies while also actively pursuing alliances with other companies that have special strengths in order to speed up technological development.

Our 1st responsibility

Contributing to Social Development: Intellectual property

In our view, intellectual property initiatives provide a basic underpinning for a wide range of business activities and are indispensable as we work to differentiate DNP from competitors. Because the competitive standing of our

intellectual property greatly affects DNP's business, we work at generating high-quality patents and making maximum use of our intellectual property in our business operations.

Our 2nd responsibility

Information Security

Information security and the protection of personal information have become more important than ever. Because DNP handles a large volume of personal information and other information assets, proper management and protection of information assets are critical tasks that can

even be called part of our social mission. DNP positions information security initiatives among management's top-priority concerns as we work to strengthen our information security-related frameworks and educate employees about protecting information.

| The DNP Group's Basic Policy on Information Security, and Personal Information Protection Policies

It is obvious to us that we have a responsibility to protect personal information, data entrusted to us by corporate clients, and other information assets. We have established policies related to information security and personal

information protection. We maintain strict and continuous control by strengthening related systems and educating employees, etc.

TOPICS

Strengthening cyber-security measures

Now that cyber attacks are becoming increasingly artful and complex, it is no longer sufficient to rely solely on conventional border protection measures aimed at not allowing threats to enter a company's computer systems. DNP is using the technologies and expertise that it has cultivated through its businesses to construct multilayered countermeasures that combine—in addition to the conventional "entrance measures" that address things like system vulnerabilities and keeping out viruses—"inside measures" for preventing and/or containing damage in the event that an intruder does manage to infiltrate the system, and "exit measures" that prevent information from being illicitly transmitted outside the system. DNP promotes "security by design," whereby protective functions are built into a computer system from the design and development stages, as well as measures for counteracting new threats, such as periodic inspection of systems already in use to check for vulnerabilities.

DNP is also focusing on developing human resources capable of contributing to cyber security, for example by implementing training for its own employees through DNP Group company Cyber Knowledge Academy Co. Ltd., which provides educational programs for training personnel to counter cyber attacks.

In addition, we belong to the Nippon CSIRT Association, whose many corporate members aim to cooperate and share information regarding instances when information security has been breached.

Through efforts like these, DNP is further fortifying its security systems in order to resist increasingly sophisticated cyber attacks, and is preparing to quickly detect and defuse attacks should they occur.

Our 2nd responsibility

Environmental Conservation and Realizing a Sustainable Future

As a manufacturer, DNP always considers how to coexist with the Earth's environment. The most urgent problem facing humanity in the 21st century (sometimes called "the environment century") is how to coexist with nature and preserve its gifts so that we can pass them on to the next generation. One of the values set forth in the DNP Group

Code of Conduct is to help realize a sustainable society so that we can pass on an abundant Earth to future generations. The entire DNP Group is working to achieve that goal, for example by preventing global warming, protecting biodiversity, and using resources efficiently.

Environmental Targets to Achieve by the Fiscal Term through March 2021

DNP receives the 26th Grand Prize for Global Environment Award, Japan Business Federation Chairman's Prize

When applied to window glass, DNP Lighting Film effectively reflects and diffuses sunlight to make room interiors brighter. In recognition of the film's contribution to reducing electric power consumption and making living spaces more pleasant, DNP was awarded the 26th Grand Prize for Global Environment Award, Japan Business Federation Chairman's Prize.

DNP makes two types of this film, one for sandwiching between two sheets of glass during the manufacturing of laminated glass, and another for applying to window glass that is already in place in a building. After we applied DNP Lighting Film to laminated glass used in windows installed on the northern side of a building where there was little sunlight, brightness in the room roughly doubled^{*1}, and the cost of electricity required for lighting decreased by about 13%^{*2}.

DNP Lighting Film makes use of optical design and microfabrication technologies that DNP cultivated while making optical films for display products. By optimizing the optical characteristics and structure of the material used for this product, we designed it to efficiently take in sunlight all year round. Because effective use of natural light leads to reduced power consumption and more pleasant living spaces, more and more homes, offices,

shops and hospitals, etc. are adopting this type of lighting film.

Since DNP positions Environment and Energy as one of our targeted growth areas, we are working to develop new products and services that simultaneously enable economic growth and environmental preservation. Moreover, since we benefit from the bounty of nature throughout our business activities, from procurement of raw materials to product manufacturing and disposal, we are constantly considering how to coexist with the global environment. We mobilize our entire corporate Group to engage in environmental activities aimed at building a sustainable society.

Corporate Governance

"DNP" refers to Dai Nippon Printing Co., Ltd. in this section.
(As of June 29, 2017)

1. Corporate Governance

Fundamental philosophy

DNP seeks to improve earning power and capital efficiency in order to support sustained growth and increase enterprise value over the medium to long term. We established DNP Group Vision 2015, which states our corporate philosophy as: "The DNP Group connects individuals and society, and provides new value." We are

preparing an environment to allow directors to boldly pursue various business opportunities based on a healthy entrepreneurial spirit and to effectively supervise business operations, primarily in the four growth areas of "Knowledge and Communication," "Food and Healthcare," "Lifestyle and Mobility," and "Environment and Energy." We recognize that to increase our business competitiveness in the future, we must fulfill our corporate social responsibilities (CSR) and win the trust of our various stakeholders, including shareholders, customers, consumers, and employees. To this end, we regard improvement in corporate governance, including internal control systems, as a top management priority. We establish and operate systems that enable precise managerial decision-making, prompt and appropriate business execution based on these decisions, and supervision and auditing of these processes. We also conduct thorough training and education to improve each employee's awareness of compliance issues and we strive to improve our overall corporate governance.

DNP's corporate governance structure

DNP's corporate governance and internal control system will have the following structure from June 29, 2017.

<Structure diagram>

Management and business execution structure, audit structure

- DNP's organization is designed to allow directors with specialized expertise and experience in a wide range of business fields to participate in management decisions, to take responsibility and authority as they execute their work, and to supervise the work of other directors. We are working to enhance our decision making and supervisory capabilities from a company-wide perspective by appointing directors in charge of each management function. Independent outside directors also participate in decision-making in order to facilitate prompt and precise management decisions and smooth execution of those decisions, and to further strengthen proper supervisory functions. Corporate officers appointed by the Board of Directors have the responsibility and authority to execute business decided by the Board of Directors.
- In order to nimbly construct optimal management systems for responding to changes in the business environment, and to further clarify management responsibility for each fiscal year, we set the term of office for directors and corporate officers at one year.
- The Board of Directors consists of 12 directors, including two independent outside directors, and the Board ensures that meetings are run appropriately based on the Board of Directors Regulations. The Board meets once a month, in principle, to discuss and decide on important business matters. Corporate officers may also attend meetings as needed to provide reports. To speed up the Company's activities and make them more efficient, DNP has also established a Management Committee consisting of directors at the senior managing director level and above. The committee meets once a month, in principle, to review and discuss management policies, strategies, and important business matters. Decisions about director compensation, designation of director candidates, and other such matters are made in light of the advice and opinions of an Advisory Committee comprised of independent outside directors in an effort to increase the transparency of the decision making process.
- DNP has in place a Board of Statutory Auditors that consists of five auditors, including one auditor with considerable knowledge of finance and accounting and three outside auditors. In accordance with auditors' prescribed audit criteria and responsibilities, the statutory auditors conduct audits of the directors' management of day-to-day operations and, as necessary, seek information from the directors and corporate officers regarding business operations.
- DNP provides in its Articles of Incorporation for the ability to conclude limited liability agreements based on laws and regulations in order to allow directors (excluding executive directors, etc.) and statutory auditors to adequately fulfill their expected roles and to ensure useful personnel in the future. DNP and its directors (excluding executive directors, etc.) and statutory auditors have concluded agreements that limit the directors' and auditors' liability for damages within the parameters set forth in Article 423, Paragraph 1 of Japan's Companies Act, so long as they perform their duties in good faith and without serious negligence.

Reasons for choosing this structure

We ensure that the Board of Directors acts appropriately, agilely, and flexibly by adopting the organizational structure of a company with a Board of Statutory Auditors, as noted above, by introducing an independent outside director and corporate officer system, and by establishing and operating discretionary committees. We believe that adopting this corporate governance structure will allow the Company to sustain growth and increase enterprise value over the medium to long term.

The following provides an overview of the various systems that we have established to ensure appropriate business conduct at DNP and the corporate group comprising DNP and DNP subsidiaries (DNP Group), and an overview of the operation of these systems.
