#### Reasons for the revisions

Novel coronavirus (COVID-19) infections have increased again since July after a previous downtrend. The Firm takes the view that these conditions require close monitoring and also sees the risk of a considerable impact on its earnings during the peak summer season.

The Firm is temporarily withdrawing its earnings forecasts due to the lack of visibility on the future course of the COVID-19 pandemic and the lack of a reasonable basis for assessing its impact on the Firm's earnings at the present time.

The Firm will disclose a new earnings outlook when this reasonable basis exists.
